

Катя Зайцева Tartaria

TARTARIA.

SI chiamava prima Scithia; ma da trecento anni in quà i Tartari, (popoli usciti sotto il gran Chingi, da un cantone dell'Asia detto in lor lingua Mongal,) che ne hanno occupato il dominio, hanno anche mutato il nome: sotto'l quale si contiene (lasciando i Tartari Precopiti, de' quali habbiamo parlato al suo luogo) poco

Vintage photographs of *fin de siècle* World Fairs are said to depict the last remaining architectural triumphs of the Tartarian Empire.

A Tartarian "rocket-vessel"
on display at *Exposition
Universelle*, 1867

These photographs are said to be of Vanja K., a Tartarian who appeared at several World Fairs towards the end of the 19th century. Vanja was reported to have medical knowledge beyond contemporary understanding. She was also photographed in her 'flying-costume' which she said she wore when flying in her 'rocket-vessel'.

A sepia-toned photograph showing a nude woman standing in the foreground on the right, looking towards the left. In the background, a large crowd of people is visible, and a tall, ornate monument with a conical top stands prominently. The scene is set outdoors, likely at a World Fair.

Another photograph circa 1874 depicting a Tartarian
giantess at a World Fair. Her nakedness was quite
acceptable in her culture, but emphasizes the differences
between their Empire and Western mores.

Tartarian architecture was identifiable by its intricate filigree detailing and immense size.

Two Tartarian women at an exposition in Prague, 1892

The Tartarians had mastered a technology capable of transmitting electricity through the air. Photographs such as this are said to show this process in action.

Another example of a photograph said to show electricity being transmitted like radio waves from Tartarian buildings.
